Of Winter.

Winter, the firſt Quarter Aſtronomicall of this yeere was begun on Fryday the 11. of December laſt paſt, when the Sunne entred into the firſt minute of Capricornus. This time is like to be very cold not without moiſt moiſture, as cold Raines, ſleete, ſome Snow and haile with froſts and boyſtrous winds, noyſome to men and beaſts, and eſpecially in the firſt part, or not long after the beginning; but towards the middle not ſo fierce, yet very raw cold, lowring and cloſe, and towards the end more temperate and cheerefull.

The Sicknesses like to be in this season, are these or else such like, namely: Fluxes of bloud, and others, Aches in the heads and backs of men and women, Frensies, Dotings, the Lithargie, Hoarsenes, immoderate Rhumes distilling diuersly into the parts of the body, as the Lungs, Brest, Iawes, Teeth and shoulders, Backe, Armes, Hands and into the feet: also Coughs, Rhumes of the Stomach, Hemeroids, and Feuers of sundry sorts very grieuous and of continuance.

Of the Spring.

The Spring beginneth the 11. day of March next being Wednesday, and the day and night being then of one equall length, and so the day doth increase for our comfort vntill the Sunne hath passed through the three Vernall signes, Aries, Taurus, and Gemini, and become vnto the beginning of Cancer, where the Spring season endeth.

As concerning the state and temperature of the weather, I gather that this time will be for the most part temperate and seasonable, yelding good increase of things growing vppon the earth through the good blessing of God, yet there will not want some storms and blustring winds, with thunder claps and clouds

ouer

euer casting and hyding the feruency of the Sunnes heate for some season.

Touching the sicknesses of this season, they are most like to molest & grieue, as well men as women, according to the sentence of Hypp. and Galen, Aches in the head, watering of the eyes, Dimnesse of sight, procured and comming through some sharpe humor, Vertigo, Swellings in the throat and necke, noises in the head and eares, Coughes, Hoarsnes, sharpe Feuers, scabs, ytchings, the gout, and such like sicknesses.

Of Summer.

SUmmer the third part and quarter of this yére, doth begin at the entring of the Sun into the first minute of Cancer, which shall bee with vs, this yére vpon Fryday the 12. day of June.

This season is by nature hot & dry likened to choller turning the humors in mens bodies from cold and moysture, vnto heat and drynesse, and spreadeth the same abroad to the parts of the same. This quarter I suppose will vary somewhat from his proper kind being variable and inconstant touching the windes & weather, more yelding in some part herof, small showers and moysture, then much drought, hauing many darke clouds and suddaine windy blasts from the Northwest and some Eastwardly.

The sicknesses and diseases generally which are

likely to molest the people, are hot Agues, as quotidians, Tertians, Inflamations of the Liuer, Swellings, Cholicke diseases, stytches in the sides, spitting of bloud, the Pestilence or pestilent Feuers, the Shingles, Chollerick passions, the Strangury and Aboꝛtions and vntimely birthꝭ, Shoꝛtnesse of wind and many such like griefes, which are too long to set doꝛwne, and vnpleasant to suffer, wheꝛefoꝛe I cease to speake any further of this Quarter.

Of Haruest.

HArueſt oꝛ the fal of the leafe, is the laſt part of the yeꝛe Aſtronomicall, which is the moſt pꝛofitable ſeaſon of the whole yeꝛe, and doth begin when the Sun entreth into the firſt minute of the ſecond Equinoctiall ſigne Libra, which will bee this yeꝛe vpon Sunday the xiij. of September, at which time the day and night is of equall length, as beꝛoꝛe it was in March.

The diſpoſition of this ſeaſon is alwaies inconſtãt and variable, by which meanes it is the nurſe & foſter of moſt ſickneſſe that do happen in the ſpring. Concerning which diſeaſes thoſe that are likely to happen, they are Quartan Agues, Blacke Iaundies, Conſumptions, Dꝛopſies, Gouts, Stranguries, ſmall Poꝛe and Meaſells, with many others: wheꝛefoꝛe I doe aduiſe all ſoꝛts of people to haue a ſpeciall regard to their diet, that ſo they may auoid many of the afoꝛenamed diſeaſes, and foꝛ that cauſe let them vſe the counſell of the learned Phiſition.
